Billing shall commence at the time of connection to the Board's water works system, except for those service applicants applying on or before June 21, 1989, whose billing shall be in accordance with Section 23 of these Rules and Regulations.

Once connection has been made to the Board's water works system, the owner and his successors and assigns shall be obligated to henceforth pay the property's proportionate share of the Board's indebtedness, as determined by the Board, and regardless of whether or not water is being used at property.

The Board reserves the right to adjust these rates from time to time as it sees fit in order to have the Board's revenues meet its expenses.

6. **Reduction in Consumer Rates**

The consumer may at any time make payment to the Board in an amount that equal to the present worth value of his proportionate share of the Board's outstanding indebtedness, as determined by the Board. Subsequent to this payment, the base rates for water usage for that consumer shall be correspondingly reduced by the Board.
