

# Septic Tank Lists

---

Septic tanks installed in Wyoming, as specified in permits to construct or notices of coverage issued by DEQ or delegated county programs, are listed on the following pages. All but Carbon, Niobrara, Platte, and Weston counties are delegated the authority to permit septic tanks. Please check with the delegated program for the county where the tank will be installed as they may have additional or more stringent requirements for permitting septic tanks.

**Septic Tank Clean-Out Riser Requirement - Either a 6-inch diameter clean-out riser or the man-way from each compartment of the septic tank must be extended to the ground surface from all septic tanks.**

**“A List”** – Septic tanks on this list still require permits, but the review process is shorter because the basic design and specifications were evaluated in detail prior to the original installation.

**“A List” Wyoming**

**“A List” Other States**

**“B List”** – The use of “low profile” septic tanks on the **“B List”** may be approved on an individual basis when justified by onsite conditions.

## "A-List" Wyoming of Previously Approved Septic Tanks

City	Supplier	Size (gal)	Compartment	Approval Letter & Tank Drawings Link
